

Set your Search Price Ranges

Browsing by price is a very common way for people to shop in your store and is easy to use in ShopTab's Facebook store.

Many of our clients want to create unique tiers for the price range search option. ShopTab allows you to set ranges that will work best for your store buyers. The application is set-up with default settings as noted below.

Don't show price filters in search bar.
 Select to hide the price filters.

Price Ranges

50 (will read as "Less than X")

50 to 100

100 to 200

200 to 500

500 (will read as "More than X")

Note that you can turn off the filter in the store app.

You may create ranges that work best for your products and currency.

Don't show price filters in search bar.
 Select to hide the price filters.

Price Ranges

1 (will read as "Less than X")

1 to 10

10 to 250

200 to 500

400 (will read as "More than X")

The text noted is in the translation table so that you can edit for different wording or a new language.

- You may:
- Overlap ranges
 - Start ranges with the same number
 - Skip ranges of numbers

Make your changes in "Store Design" and select Update and your search tiers will change.
